

PFISTERER honours long-time employees at Gussenstadt

Gussenstadt, Germany – 8 February 2023 – PFISTERER Kontaktsysteme GmbH in Gussenstadt held an anniversary celebration to honour long-time employees – one of whom has been with the company for 40 years.

Bernd Berger has been a loyal employee at PFISTERER for forty years – a long and exciting time in the company’s history, as became clear during the anniversary celebration. Bernd Berger started his apprenticeship at the Gussenstadt plant at a young age. Today, he is responsible for industrial training himself, and was honoured for his 40 years of service. After a plant tour with families led by site manager Hermann Schuller and Joachim Schauz, managing director Dr. Konstantin Kurfiss together with HR director Tobias Liedl paid tribute to the long-serving employees, presenting company gifts as well as official certificates from the Chamber of Industry and Commerce. They also gave their special thanks to Steffen Jordan and Gerhard Fronius for their more than 25 years of service, as well as to the following employees who have worked for PFISTERER for more than 10 years: Brigitte Balzer, Denise Bruckmeier, Nico Bretschneider, Danny Christoforidis, Thorsten Geiger, Julia Hebenstreit, Christian Lotspeich, Patrick Schaffer, Gerhard Schuller and Brigitte Tekert.

High technology from Gussenstadt

A high-tech company with firm roots in the region, PFISTERER has been developing and manufacturing components for power lines for more than 100 years. The Gussenstadt plant was founded in 1946, and is now PFISTERER’s metal competence centre, employing around 225 people. Using state-of-the-art equipment, it produces technologies for connecting and contacting electrical conductors as well as safety equipment. PFISTERER’s customers include well-known power grid operators and OEMs worldwide.

About PFISTERER

In 1921 Karl Pfisterer founded his factory for special electrical products in Stuttgart with the aim of improving the world of power transmission. The PFISTERER Group has pursued this goal of quality and technological leadership for more than 100 years. Today, PFISTERER is one of the world’s leading specialists and system suppliers for energy infrastructure – with a complete range of cable accessories, overhead line technology and components along the entire transmission chain from power generation to consumption. With state-of-the-art manufacturing processes and 1,200 employees at 19 international locations, PFISTERER not only connects the power grids of today and tomorrow, but also makes an important contribution to a sustainable and secure power supply.
